10th 81.60%: Tavanappa Patane Highschool Kolhapur (2015)

Experience:

Wipro | Frontend React Developer | 09/2021 - Current

- **UHG Optum Provider-Express UI Rewrite**

Team size: 10-15 **Location:** Bengaluru

Role and responsibilities:

- Analyzed the existing application in the Angular repository, considering existing provider functionalities, and planned the migration to Next.js with a focus on performance.
- Implemented reusable components using Radix-UI primitive to achieve accessibility.
- Worked on custom components in React such as transfer list, multiselect tags from scratch or using react libraries with custom styles to meet the requirements.
- Integrated RESTful APIs into the frontend, including handling errors and displaying success messages.
- Involved in sprint progress demos and worked on feedback received by team members.
- Participated in daily stand-ups, sprint planning, retrospectives, and worked on user stories.
- Delivered new features as per business requirements and collaboratively worked with different teams.
- Participated in code reviews to ensure high-quality software.

- **Aramco LAB7 Portal**

Team size: 5 **Location:** Bengaluru

Role and responsibilities:

- Collaborated with the Drupal team to understand portal requirements.
- Collaborated with Designers and QA to maintain design and application consistency.
- Developed various pages according to design specifications using HTML5, CSS3, jQuery, and JavaScript.
- Implemented responsive design for mobile, desktop, and tablets using CSS media queries.

- Resolved bugs and addressed feedback reported by the team.

- **Shared Progress site**

Location: Bengaluru

Role and responsibilities:

- Independently developed the Single Page Application using React, HTML5, and CSS3, based on the designers' specifications.
- Implemented slider functionality using a React functional component with state, props, and JSON data.
- Resolved bugs and addressed team feedback.
- Assisted the analytics team with the implementation of Google Tag Manager (GTM).

- **NGES (National Gaming Esports Strategy)**

Location: Bengaluru

Role and responsibilities:

- Developed a Single Page Application using React.
- Implemented localization for the Arabic language in the SPA using the react-i18next package.
- Implemented responsive design for mobile, desktop, and tablets using CSS media queries.
- Resolved bugs and addressed team feedback.
